

# IDISE PRAISE OGHENEKEVWE

## Frontend Developer

### PROFILE

I'm a Frontend developer with over one year experience building exciting websites that are functional, responsive and meet business or user needs.

### EXPERIENCE

#### Frontend Intern – HNG

Oct – Dec 2022

- Worked in a fast-paced setting by building web pages and meeting tight deadlines
- Worked in a team of 20-50 to build a love-letter generator website powered by GPT3
- Integrated REST APIs to build the functionality of contact and reset password pages for the love-letter generator website
- Collaborated with the design team to build webpages exactly as the Figma design specifications
- Built various responsive and functional web pages like a Linktree clone and MetaBNB for renting hotels in the metaverse

#### Frontend Developer – MILA Group

Jan – March 2022

- Built the entire company website from scratch
- Collaborated with the team members to discuss new features
- Worked on the website optimization and periodic updates to improve SEO
