

# IDISE PRAISE OGHENEKEVWE

## Frontend Developer

### PROFILE

I'm a Frontend developer with over one year experience building exciting websites that are functional, responsive and meet business or user needs.

### EXPERIENCE

#### Frontend Intern – MERCATOR TECHNOLOGIES LTD

Mar 2023 – Present

- Created a compelling landing page for the company's new product launch.
- Developed multiple pages of a complex web POS monitoring system from scratch, optimizing performance through timely updates.
- Translated Figma designs into a functional user interface, ensuring accuracy and attention to detail.
- Integrated various APIs to seamlessly display relevant data for the POS monitoring system.

#### Frontend Intern – FREDACOM

Jun 2023 – Present

- Revitalized the company's website using React, including the integration of a blog and building product functionalities.
- Successfully migrated the company website to a new hosting provider, ensuring optimal performance.
- Translated Figma designs into a functional user interface, emphasizing accuracy and attention to detail.
- Integrated various APIs to seamlessly display relevant data.

#### Frontend Intern – HNG

Oct – Dec 2022

- Collaborated in a fast-paced environment to build web pages, meeting tight deadlines.
  - Contributed to a team of 20-50 in creating a love-letter generator website powered by GPT3.
  - Integrated REST APIs for contact and reset password pages, enhancing the functionality of the love-letter generator website.
  - Worked closely with the design team to implement webpages according to Figma design specifications.
- Developed responsive and functional web pages, including a Linktree clone and MetaBNB for renting hotels in the metaverse.
