

## PROFILE

I am looking for a job where I can put my training and skills to good use while also contributing to the company's success.

## SKILLS

**Languages:** HTML, CSS, JavaScript

**Frameworks and Libraries:** React, Redux, Tailwindcss, Styled components

**Tools & Methods:** Git, Github, Netlify, Browser Dev Tool

**Professional skills:** Logical analysis, Comprehensive planning, Effective communication

## EXPERIENCE

**Front-end Intern** | HNG Internship

Oct – Dec 2022

- My team and I worked together to create LoveMe web app, a love letter generator, and I contributed by building the reset password and contact us pages and functions.
- I also built a "Linktree" clone with React.js for customizing your bio links.
- I built "Metabnb," a landing page for renting hotels in the Metaverse, with React.js.

**Apprentice** | Nobok Computers

Nov 2017 – Mar 2018

- I gained knowledge of computer hardware configuration.
- I learned the proper procedures for installing and managing software on a computer.
- I learned the proper steps for troubleshooting a computer as well as how to perform regular computer upgrades.

## EDUCATION

2018-2023

B.Tech in Urban and Regional planning, Federal University of Technology Akure
